

HM DASH

Release Notes

HM Dash Release Notes – YAMAHA 2010- TYPE 2 (R1 2009 – 2011)

30-Aug-2015 11:21

Version 7H - Release

Updates

1. New models up to 2015 added.

Fixes

1. Addressed a problem where, if SPEED SOURCE setting was GPS, if GPS lost satellite signal mid-session, it could cause erroneous odometer and trip advancement based on erroneous GPS data received while the GPS had lost satellite signal. The correction prevents the Dash from using GPS data for odometer and trip data while signal is lost. Once satellite signal is regained, then the current location is compared to the location where the signal was lost, and the distance between them is added to the odometer and trip values.
